

FortiSASE Core Administrator

Course Description

In this course, you will learn how to deploy and manage FortiSASE to provide secure internet access and protect access to Software-as-a-Service (SaaS) applications for users working from on-site or remote locations. These topics will help you build a fundamental knowledge of FortiSASE basics, and learn how to enforce security policies using endpoint profiles and content inspection.

Who Should Attend

Networking and security professionals involved in the design, administration, and management of FortiSASE-based network deployment should attend this course.

Prerequisites

- *FortiOS Administrator*
- *FortiClient EMS Administrator*
